

I would like to tell you how valuable I find XM's service. They offer a variety and a quality that cannot be found on regular AM/FM radio. I find the service to be very well worth the fee that I pay every month. I have two other family others who have purchased XM's service and I know I speak for them as well when I write about how much we enjoy our XM service. Since my family and I pay for this service, we should be the ones to dictate what we hear not the NAB. I urge the FCC to reject NAB petition 04-160 as I 100% support XM's ability and right to broadcast the kind of programming that they do including the traffic and weather service which I frequently listen to. Thank you for your attention.
